

Flia

FLOOR
OUTDOOR
PORTABLE

Alessandro Zambelli, 2020

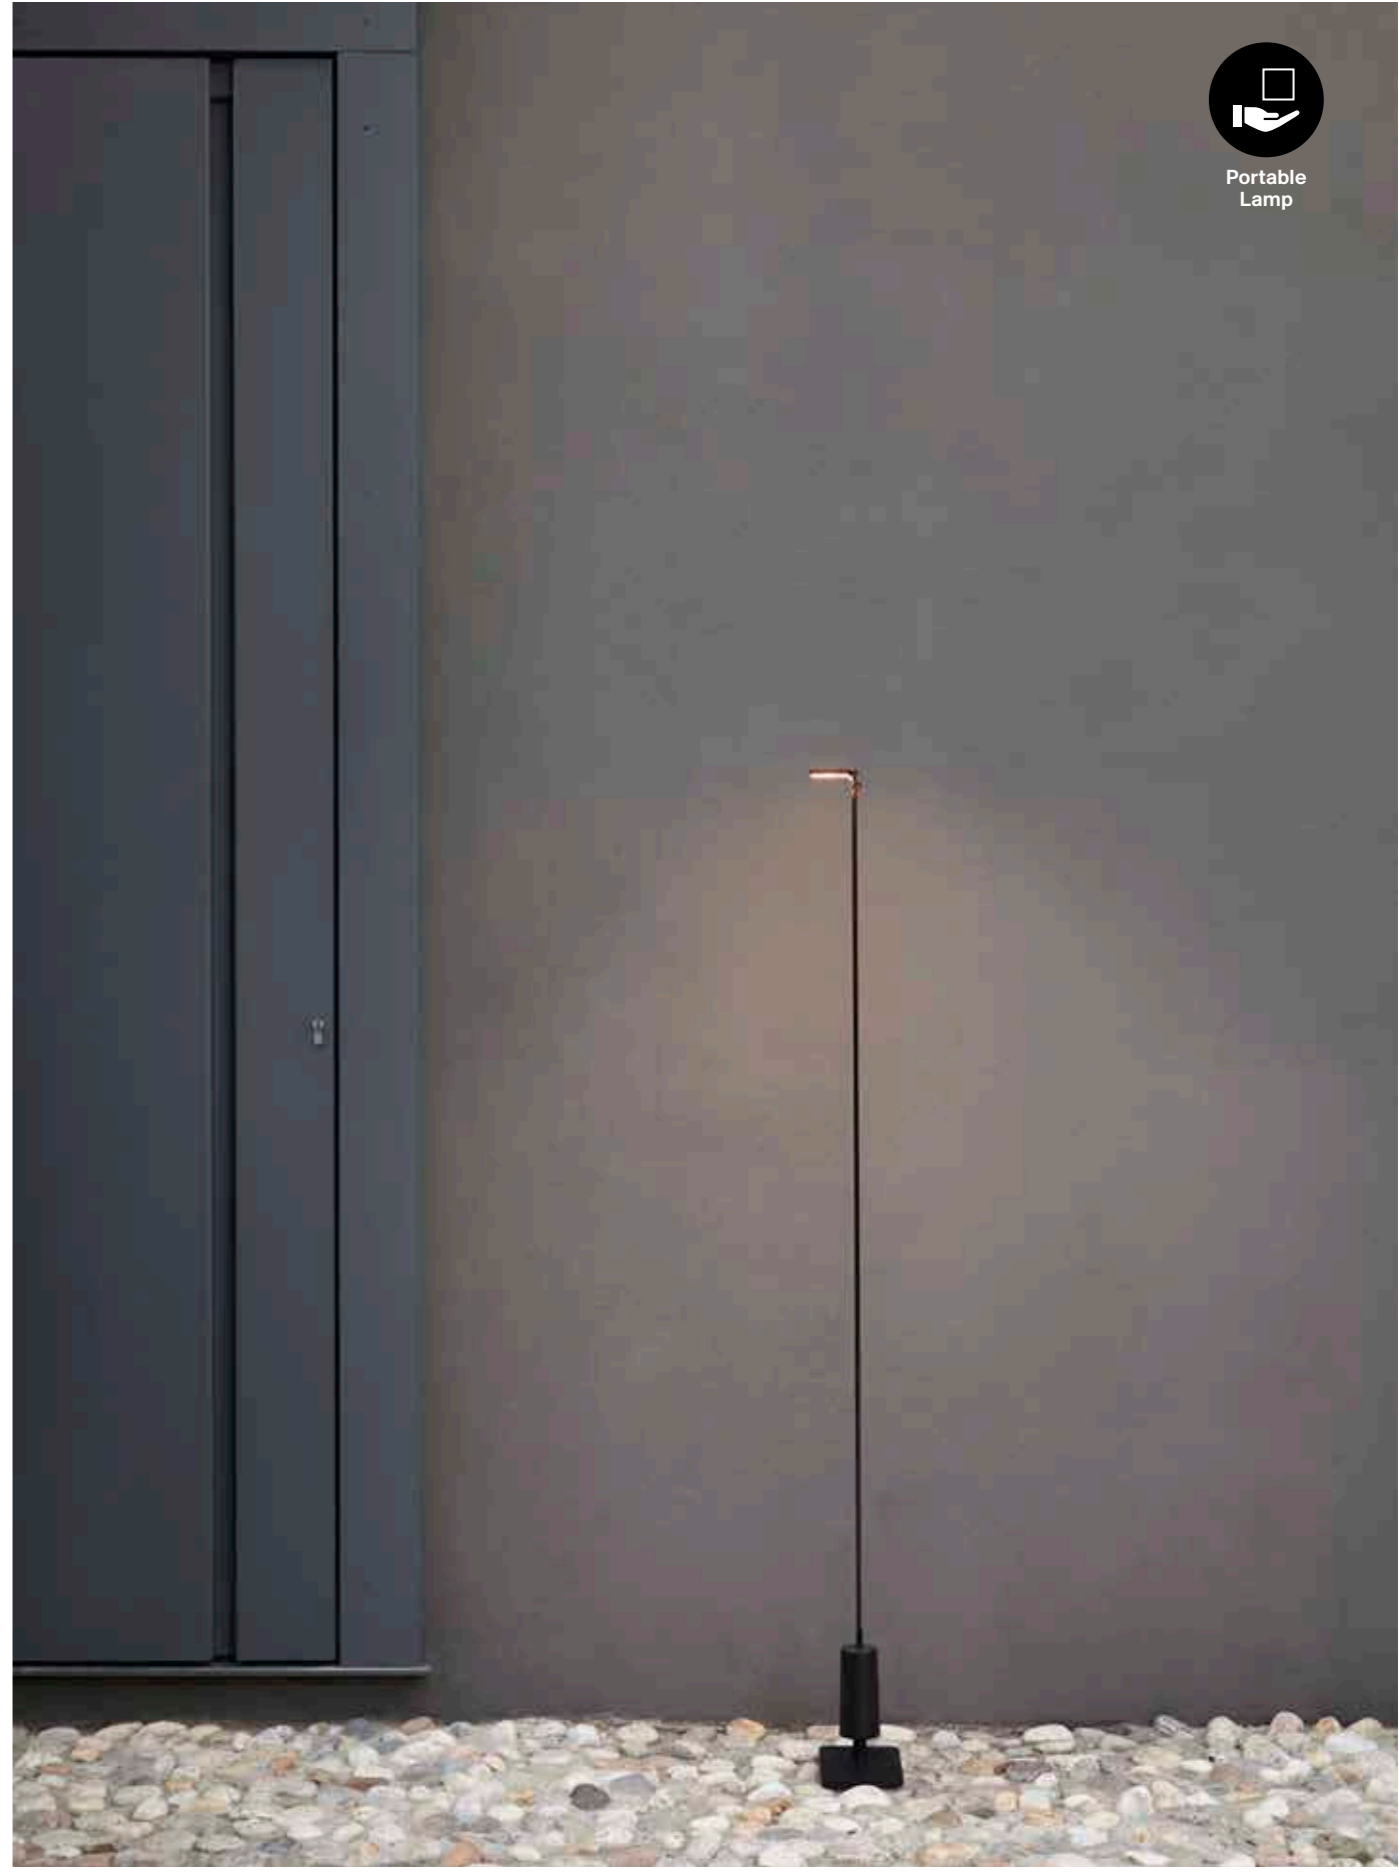

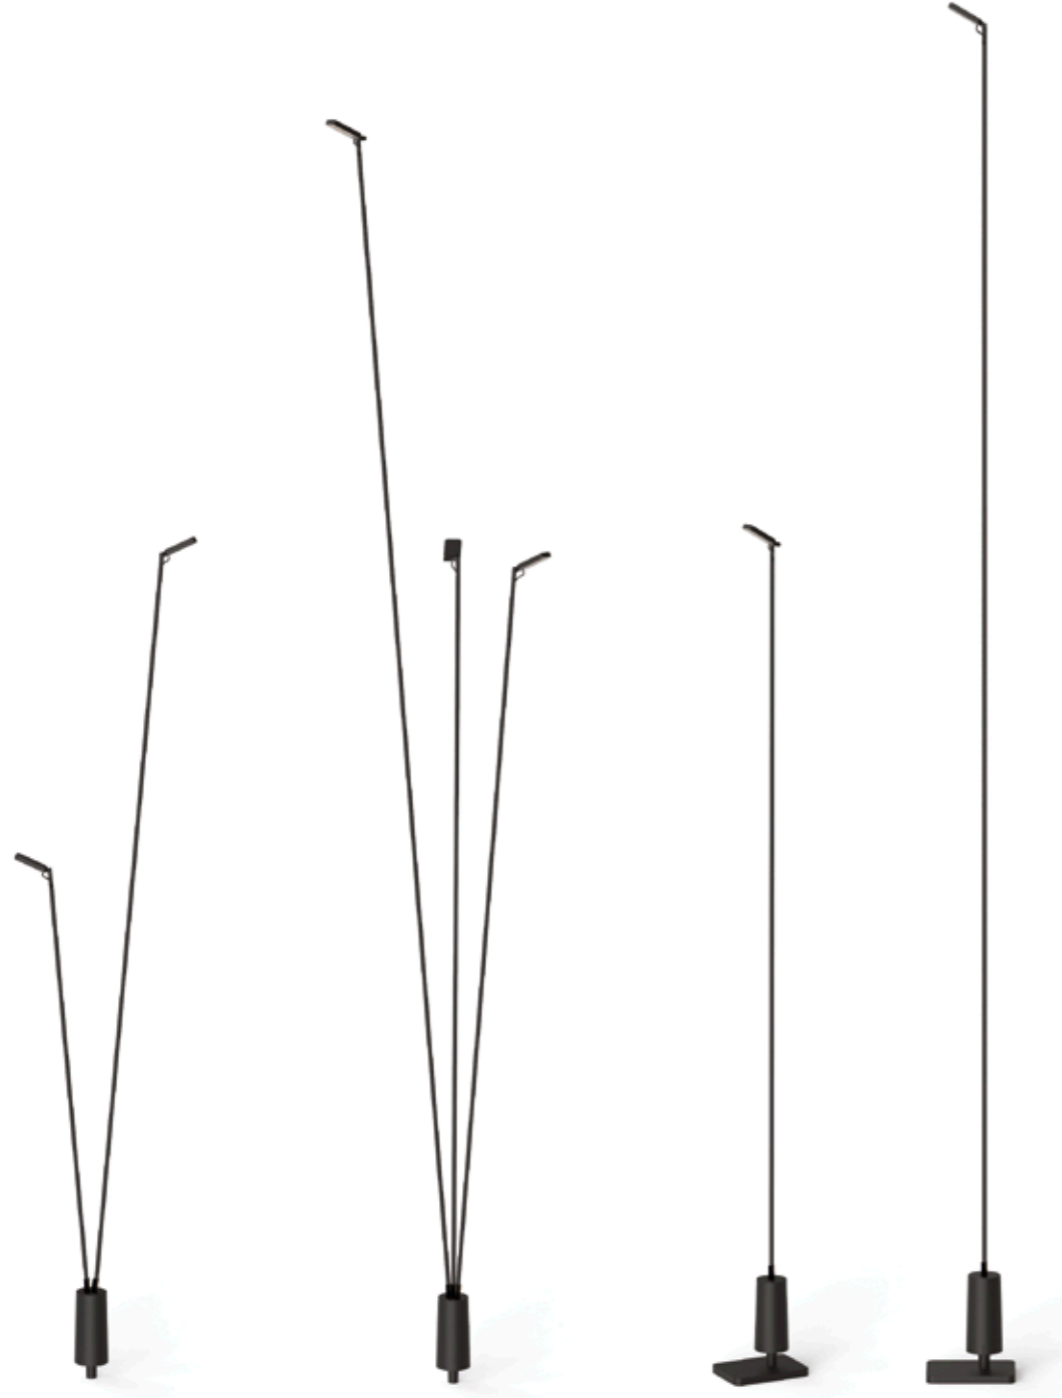

EN The Flia family of outdoor floor lamps stands out for its ability to combine technological aspects with rigorous expressive forms. The miniaturization of the light source is a key factor of the project. The carbon stem is supported by a cylinder that contains the core elements and grants the lamp strength, lightness and flexibility. Flia is available in a single configuration - with three different heights - or multiples - with 2 or 3 stems - and can be attached to floors and decks, or directly on the ground. The lamp becomes nomadic, adapting to different types of spaces and needs, thanks to the rechargeable version.

IT La famiglia di lampade da terra outdoor Flia si contraddistingue per la capacità di coniugare aspetti tecnologici e rigorosa espressione formale. La miniaturizzazione della fonte luminosa è il punto cardine del progetto. Lo stelo, in carbonio, è sostenuto da un cilindro contenente il cuore pulsante e conferisce alla lampada resistenza, leggerezza e flessibilità. Flia è disponibile in configurazione singola - tre diverse altezze - oppure multipla - a 2 e 3 steli - e può essere fissata a pavimento o direttamente al terreno. La lampada diventa anche nomade, in grado di adattarsi a diverse tipologie di spazi e alle più svariate esigenze, grazie alla versione ricaricabile.

DE Die Bodenleuchten der Flia-Serie für den Außenbereich zeichnen sich durch ihre Fähigkeit aus, die technologischen Aspekte und den strengen formalen Ausdruck zu kombinieren. Die Miniaturisierung der Lichtquelle ist der Schwerpunkt des Projekts. Der Ständer aus Carbon wird von einem Zylinder gestützt, der das Herzstück enthält und der Lampe Stabilität, Leichtigkeit und Biegsamkeit verleiht. Flia ist in Einzelausführung - in drei verschiedenen Höhen - oder in Mehrfachausführung - mit 2 und 3 Armen - erhältlich und kann am Fußboden oder direkt auf dem Gelände befestigt werden. Dank der wiederaufladbaren Version wird die Leuchte außerdem zum Nomaden, der sich an verschiedene Raumtypen und die unterschiedlichsten Bedürfnisse anpassen kann.

FR La famille de lampadaires d'extérieur Flia se distingue par sa capacité à allier les aspects technologiques et une expression formelle stricte. La miniaturisation de la source lumineuse est la pierre angulaire du projet. Le mât, en carbone, est supporté par un cylindre contenant le centre vital et il donne à la lampe résistance, légèreté et flexibilité. Flia est disponible en configuration unique (trois hauteurs différentes) ou multiples (avec 2 et 3 mâts) et peut être fixé au sol ou directement sur le terrain. Grâce à la version rechargeable, la lampe se fait également nomade, capable de s'adapter aux différents types d'espaces et aux besoins les plus variés.

ES La familia Flia de lámparas de pie para exteriores se distingue por su capacidad de conjugar aspectos tecnológicos con una rigurosa expresión formal. Este proyecto gira en torno a la miniaturización de la fuente luminosa. El pie, fabricado en carbono, se apoya en un cilindro que contiene el corazón latiente de la lámpara y que le confiere resistencia, ligereza y flexibilidad. Flia está disponible en versión simple (tres alturas diferentes) o múltiple (con 2 y 3 pies) y puede anclarse a un suelo pavimentado o directamente a un suelo de tierra. La lámpara también se hace nómada, capaz de adaptarse a diferentes tipos de espacios y a las necesidades más variadas, gracias a la versión recargable.
